FARCLIMATE

MOVING FORWARD TO ACHIEVING CLIMATE-RESILIENT AND SUSTAINABLE EUROPEAN REGIONAL ECONOMIC SYSTEMS

Welcome to FARCLIMATE's 3rd Newsletter!

Since March 2025, **FARCLIMATE** has been actively advancing its mission to strengthen climate resilience across Europe.

We began the year with two key events in Galicia, Spain, focused on climate adaptation in the fishing sector, followed by the three-part **Collaborative Cities Webinar Series** in April, bringing together experts to share solutions for sustainable urban transformation.

In May, we gathered in Soria, Spain, for the **3rd Consortium Meeting**, reviewing progress and exploring forestry pilot sites. The summer months saw workshops in the Rías of Pontevedra and Arousa, and in July and September, partners engaged in events in Italy and Romania, fostering collaboration and innovation with communities and sister projects. These milestones set the stage for the stories, results, and updates you will find throughout this newsletter.

Third Consortium Meeting:

Strengthening Partnerships in Soria, Spain

In May 2025, **FARCLIMATE** partners gathered in Soria, Spain, for the Third Consortium Meeting, hosted by **CESEFOR**. Over two days, partners presented progress within their respective work packages, exchanged insights from activities in different European regions, and discussed the next steps to ensure the project's success. The meeting also included a hands-on Living Lab exercise and a field visit to forest areas where pilot activities are being implemented, allowing participants to observe real-world applications of climate adaptation strategies. This gathering reinforced collaboration across the consortium and strengthened our shared commitment to building climate-resilient communities.

FARCLIMATE - GREEN GROWTH GENERATION

Inspiring Climate-Resilient Urban Futures

Green Growth Generation , within the **FARCLIMATE** project and network, hosted the **Collaborative Cities Webinar Series**, bringing together urban resilience experts, policymakers, researchers, and practitioners from across Europe. This online event series created a valuable platform for sharing insights, case studies, and practical tools on nature-based solutions, sustainable business collaboration, and multi-stakeholder engagement. Through interactive discussions and knowledge exchange, the webinars strengthened connections between cities and inspired actionable strategies for building climate-resilient urban environments.

Regional Climate Adaptation Workshop in Fundão:

Designing Mediterranean Resilience

On February 20th, 2025, the Municipality of Fundão hosted the circular **“Beiras e Serra da Estrela Regional Workshop: Pathways to Climate Resilience”** co-organised with **FARCLIMATE** and **DesirMED** under the EU’s Horizon Europe programme. This workshop served as a vital knowledge-sharing platform, uniting stakeholders from the public sector, academia, civil society, and the private sphere to tackle climate risks unique to the Mediterranean region. Through detailed analyses and visioning exercises (looking toward 2030 and 2050) participants explored how nature-based solutions can enhance resilience across key sectors such as fruit farming, forestry, and livestock. The event laid out strategic pathways for regional adaptation and underscored the power of cross-sector collaboration and traditional knowledge in driving actionable outcomes.

Two Strategic Workshops in Galicia:

Advancing Climate Adaptation in Coastal Communities

In July 2025, **FARCLIMATE** hosted two strategic workshops in Galicia, Spain (one in **Ría de Pontevedra** (July 18) and another in **Ría de Arousa** (July 22)). These sessions brought together local stakeholders, GALPs, and project partners to collaboratively identify and prioritize the most promising actions for climate adaptation in the fishing and shellfishing sectors. Building on previous risk assessments and solution proposals, the workshops fostered constructive dialogue and strengthened local engagement, ensuring that adaptation strategies are grounded in the realities and needs of coastal communities.
