

# WP1: PROJECT MANAGEMENT

## INTEGRATED MANAGEMENT: GOVERNANCE, ETHICS, AND FAIR DATA FOR PROJECT SUCCESS

### LOCAL CHALLENGE

A complex multi-partner project requires robust governance, proactive risk mitigation, ethical compliance, and adherence to Open Science principles (FAIR) to ensure efficient delivery.

### CO-CREATED PRACTICE

WP1 established a comprehensive framework: a clear governance structure (SC, GA), active risk management (FMEA, KPIs), a FAIR Data Management Plan (DMP), and a rigorous Ethical/Gender Assessment (GTA).

### HOW THE COMMUNITY APPLIES IT

The consortium uses standardized procedures and KPIs for monitoring, applies the DMP for data sharing, and integrates ethical/GDPR protocols and the GTA across all technical activities.

### WHO TO CONTACT

Universidade de Vigo (UVIGO) -  
Project Coordinator

### WHAT CHANGED

This integrated, transparent framework assures legal compliance, protects participant rights, maximizes data reuse, and guarantees timely, high-quality deliverables. It is the essential blueprint for managing any complex EU-funded project.
