

WP7: TRANSFORMATIVE SOLUTIONS

FARCLIMATE'S TRANSFORMATION HUB: RECIPES FOR RESILIENCE

THE CHALLENGE

Climate adaptation platforms often overwhelm users with technical data, lacking practical, sector-specific tools for local actors in agriculture, forestry, and fisheries. Practitioners struggle to find inspiring, adaptable solutions tailored to their bioregions.

THE PRACTICE

The FARCLIMATE Transformation Hub is a user-centered digital platform presenting adaptation solutions as "recipes". Local teams, Living Labs, and stakeholders can use it to discover, remix, and design solutions adapted to their specific contexts.

HOW TO IMPLEMENT IT

Access the Transformation Hub and filter solutions by sector, bioregion, hazard, or keywords. Then, explore "recipes" via maps, clusters, or AI summaries; save relevant ones to personal boards. Finally, remix with AI tools to generate new knowledge, share collections, connect with similar cases.

WHERE IT APPLIES

Applicable to all EU bioregions, enabling identification of solutions for regions facing similar climate risks and challenges. Scalable to other sectors.

WHY IT WORKS

It provides relevant content in usable formats tailored to local actors leading adaptation efforts. It facilitates exploring and understanding solutions through visual narratives and AI insights.
